

### M Bret Blackford

DOB: 7/16/64 (59yrs)

Sex: Male

---

## EKG Recording Overview

### Kardia Advanced Determination:

Bradycardia

\*Kardia Advanced Determination is done on Lead I.

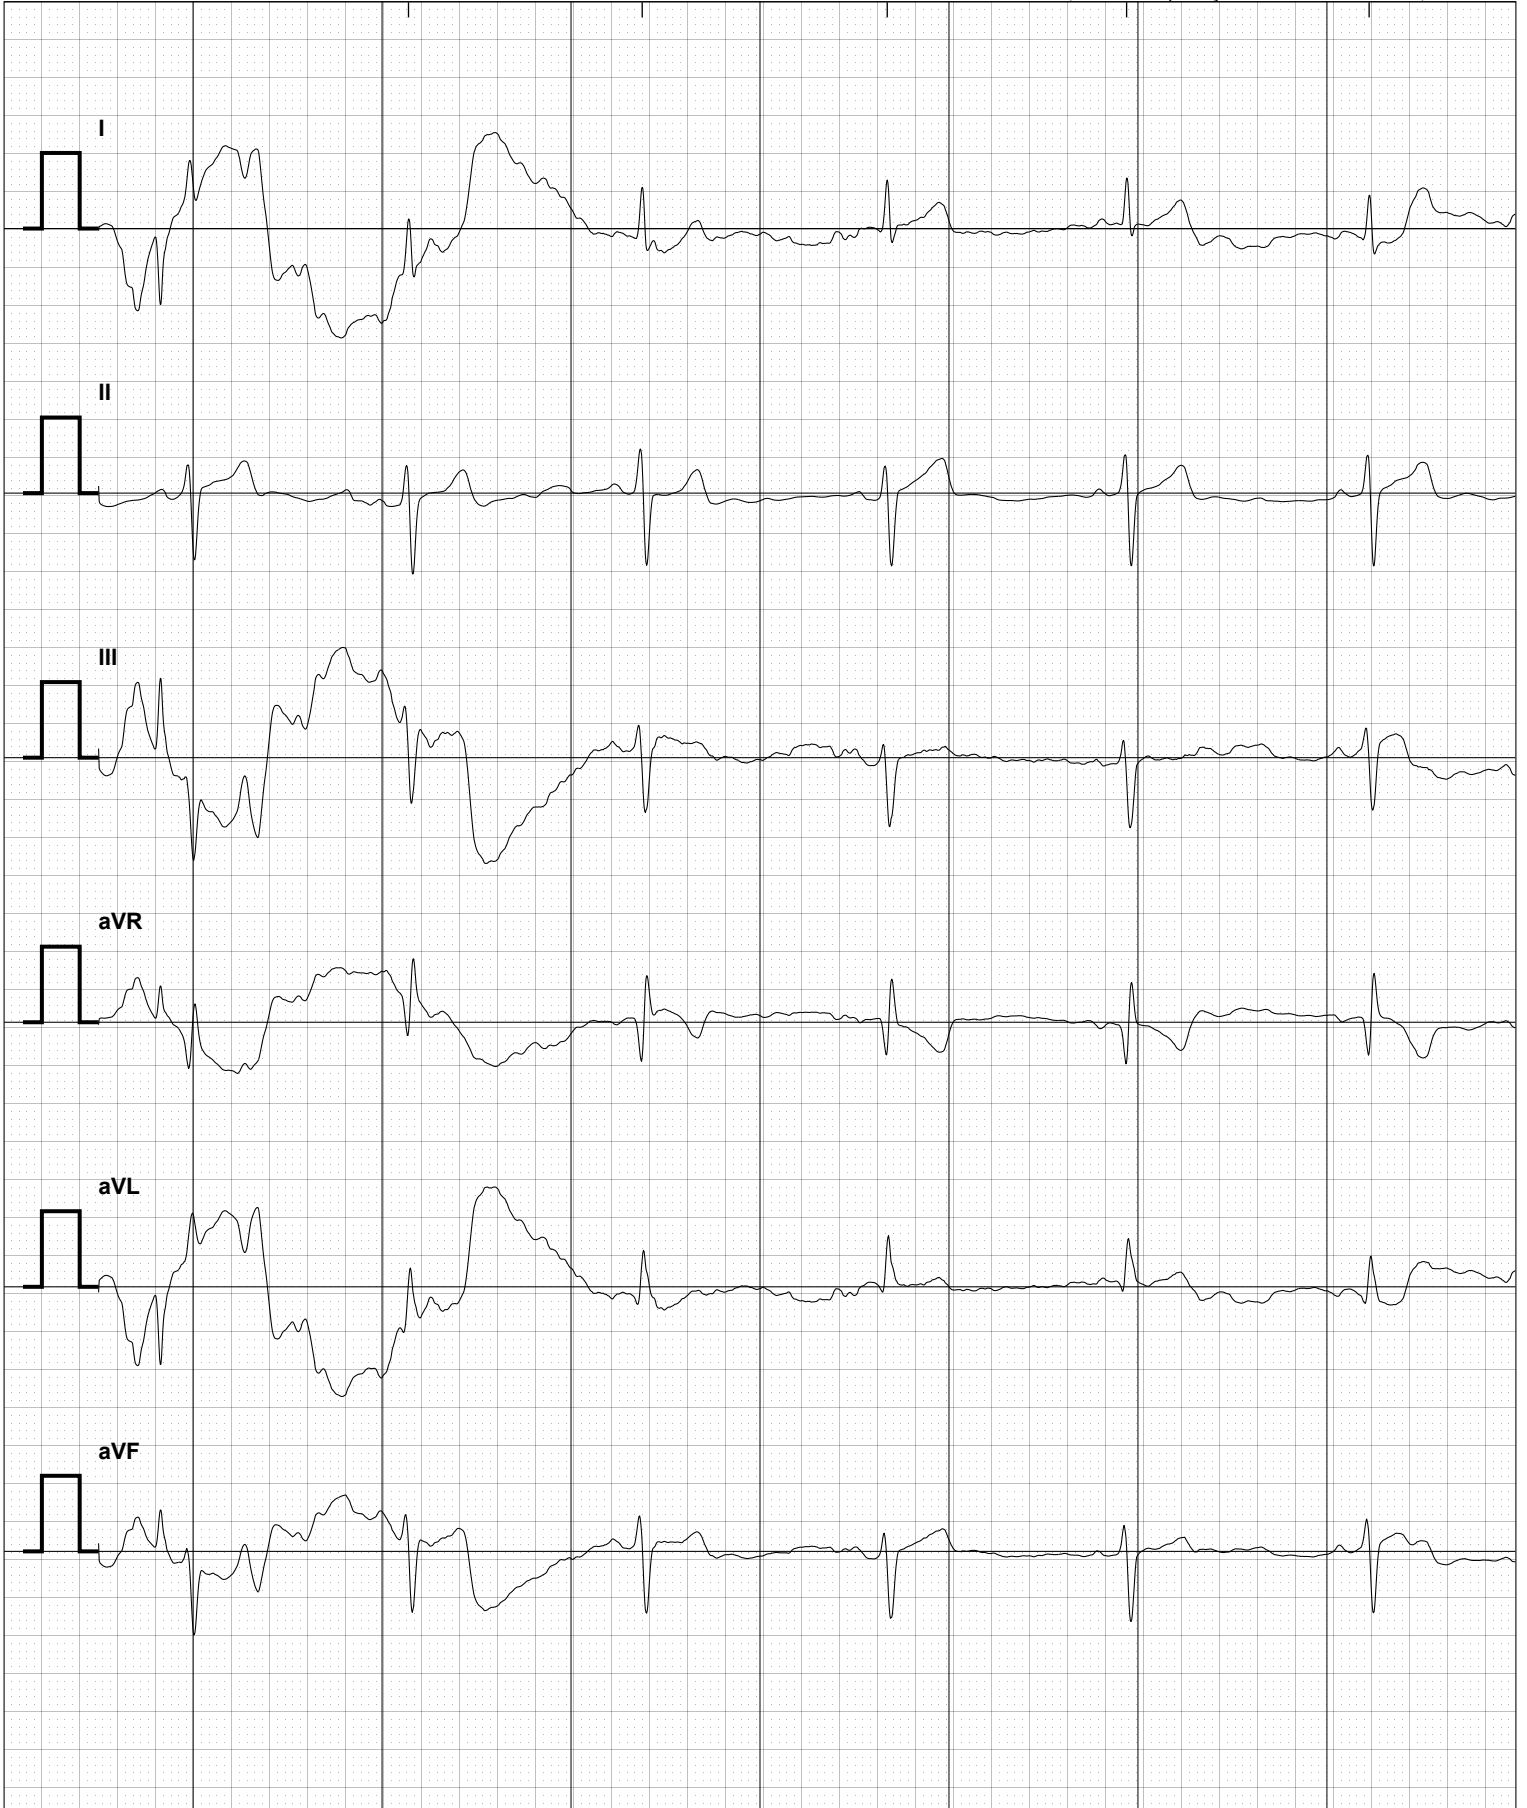

<b>Recorded on:</b>	Saturday, October 14, 2023 at 1:51:52 PM
<b>Heart Rate:</b>	49 BPM
<b>Duration:</b>	30s

---

## Additional Information

No additional information to display

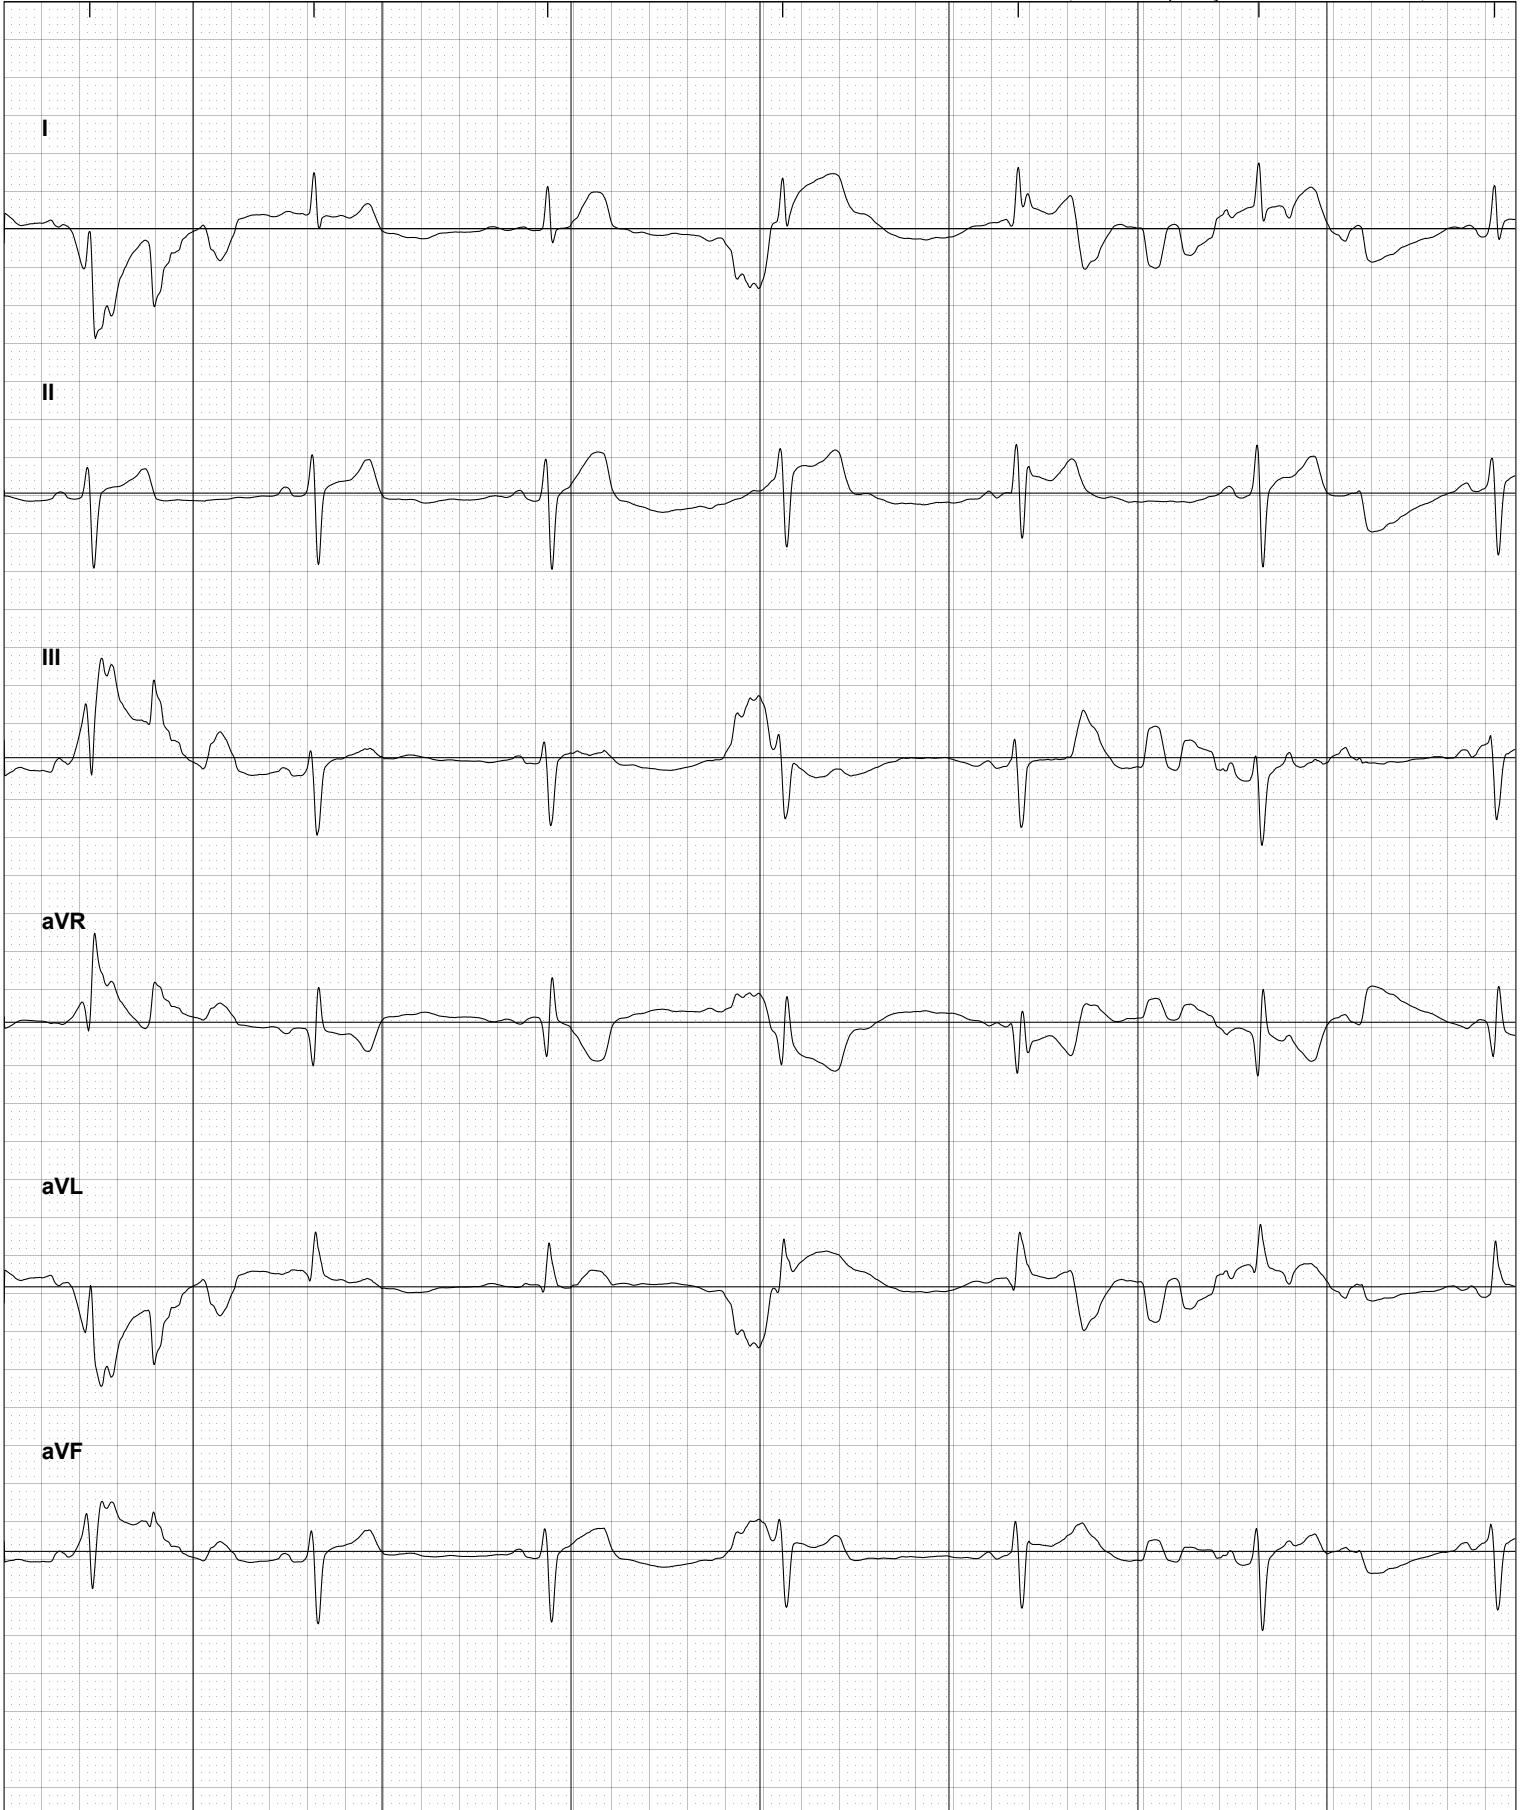

Kardia does not check for heart attack. If you believe you are having a medical emergency, call emergency services. AliveCor does not provide medical advice or services, and any information from AliveCor is provided to assist you and your doctor with your medical care and not as a replacement for consulting with your doctor.

**Patient:** M Bret Blackford  
**Recorded:** Saturday, October 14, 2023 at 1:51:52 PM  
**Heart Rate:** 49 BPM  
**Duration:** 30s

**Kardia Advanced** Bradycardia  
**Determination:**  
\*Kardia Advanced Determination is done on Lead I.

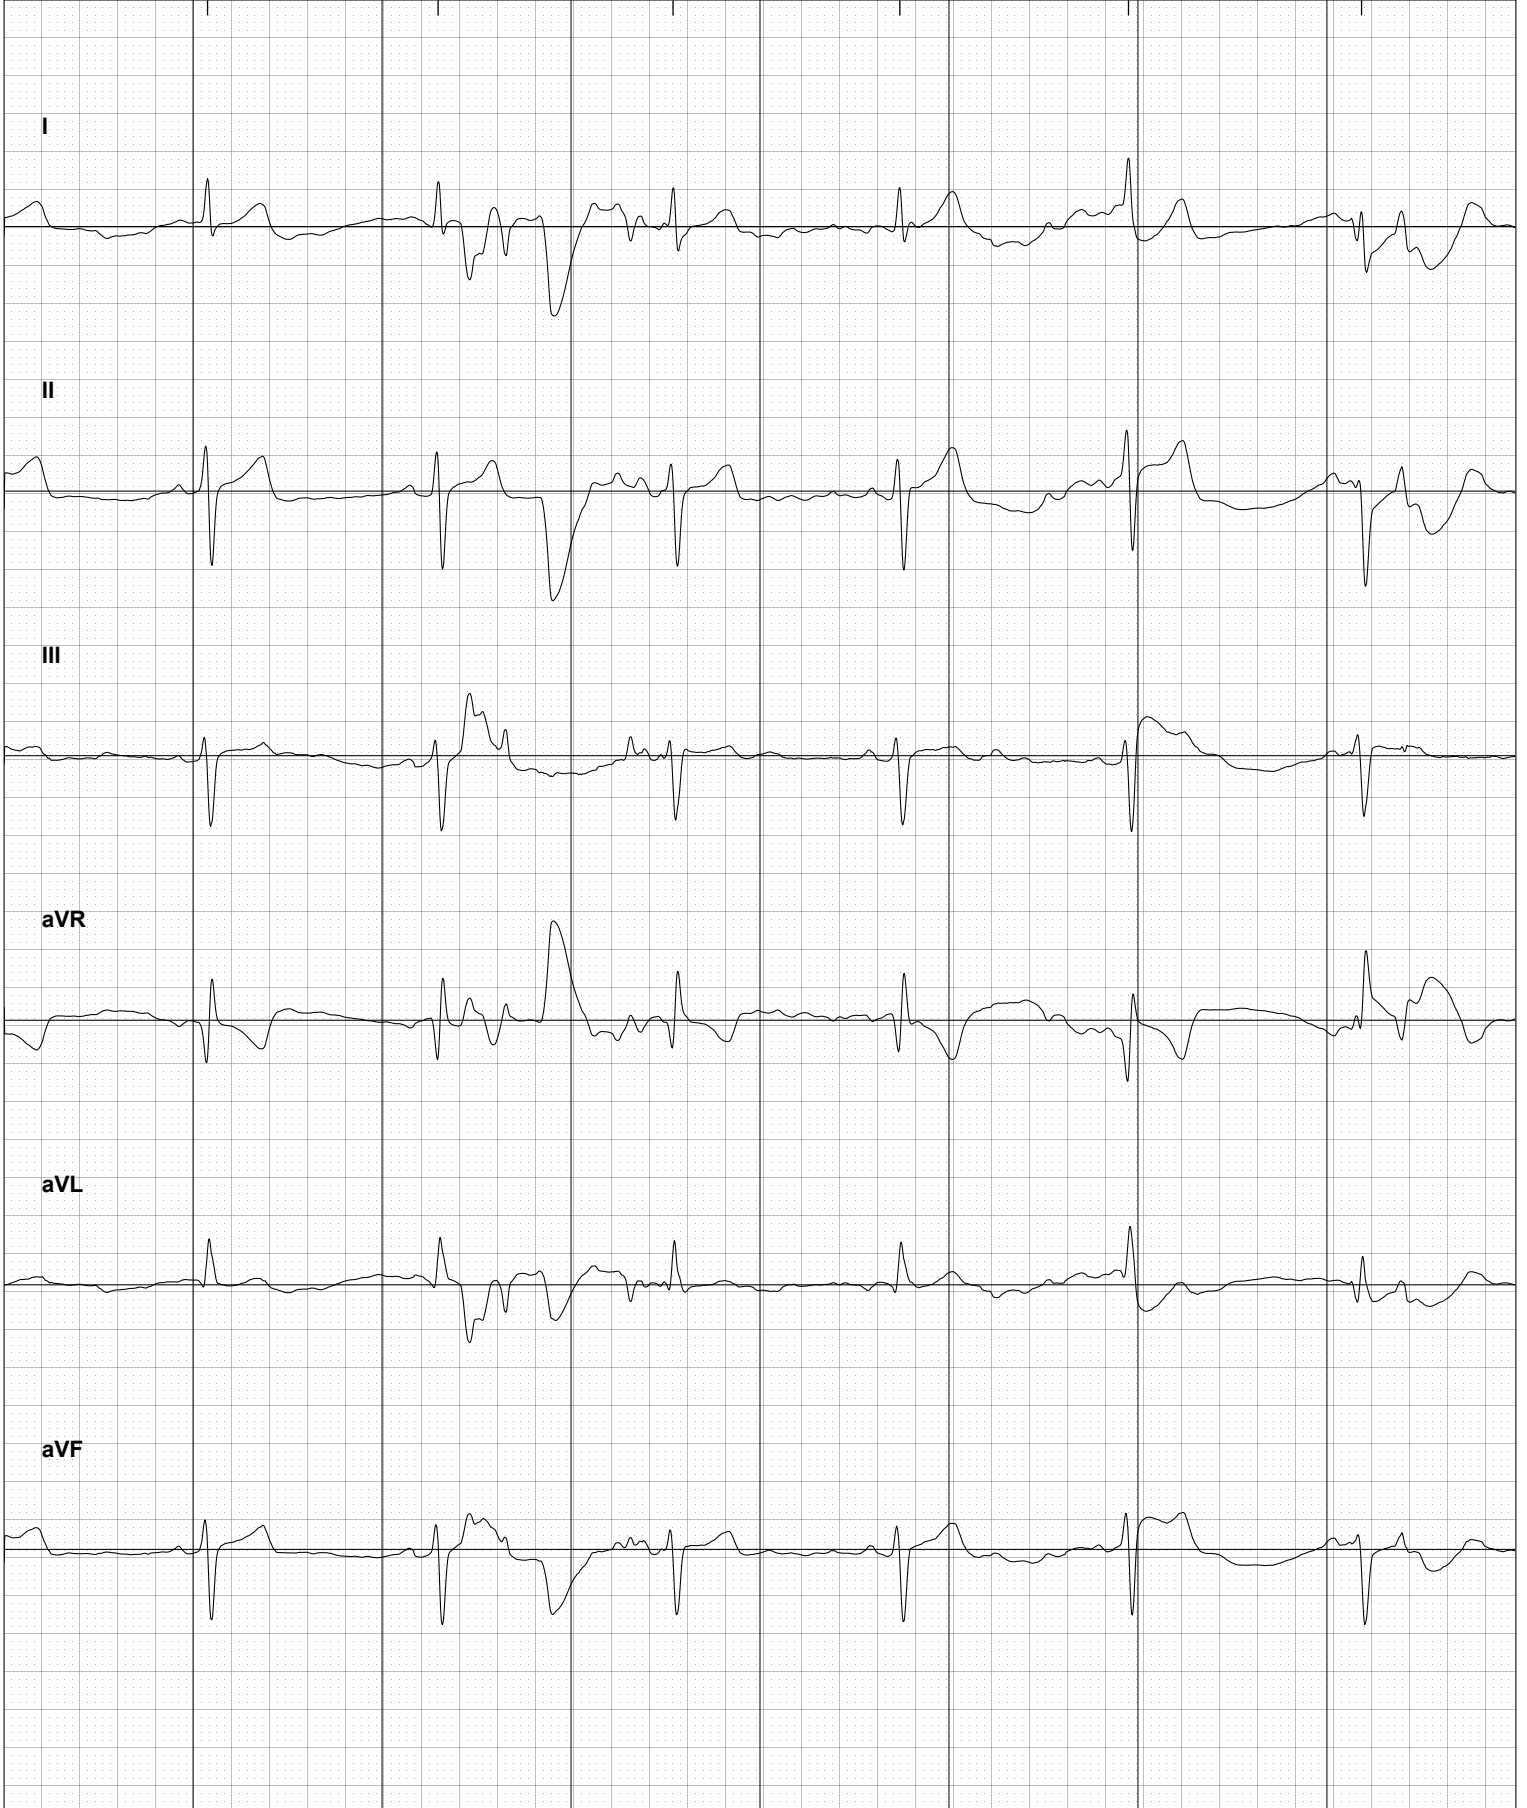

Enhanced Filter, Mains Frequency: 60Hz Scale: 25mm/s, 10mm/mV

### R-R Interval Plot

Detection of QRS locations allows Kardia AI to measure the distance between heartbeats or the RR interval. This can be used to review variability of heart rate, which may be useful in understanding heart rate variability, or to visually display irregularity in rate (such as in Afib).

### Average Beat Plot

The average beat display is the average of all the normal, non-ectopic (extra/missed) beats in the ECG. An average beat display is intended to be a simple visual representation of one beat in a 30-second ECG.
