

## M Bret Blackford

DOB: 7/16/64 (59yrs)

Sex: Male

## EKG Recording Overview

### Kardia Advanced Determination:

Normal Sinus Rhythm

\*Kardia Advanced Determination is done on Lead I.

<b>Recorded on:</b>	Wednesday, November 1, 2023 at 4:41:00 PM
<b>Heart Rate:</b>	51 BPM
<b>Duration:</b>	30s

## Additional Information

### Notes:

Bret Blackford. BP 140/87

Kardia does not check for heart attack. If you believe you are having a medical emergency, call emergency services. AliveCor does not provide medical advice or services, and any information from AliveCor is provided to assist you and your doctor with your medical care and not as a replacement for consulting with your doctor.

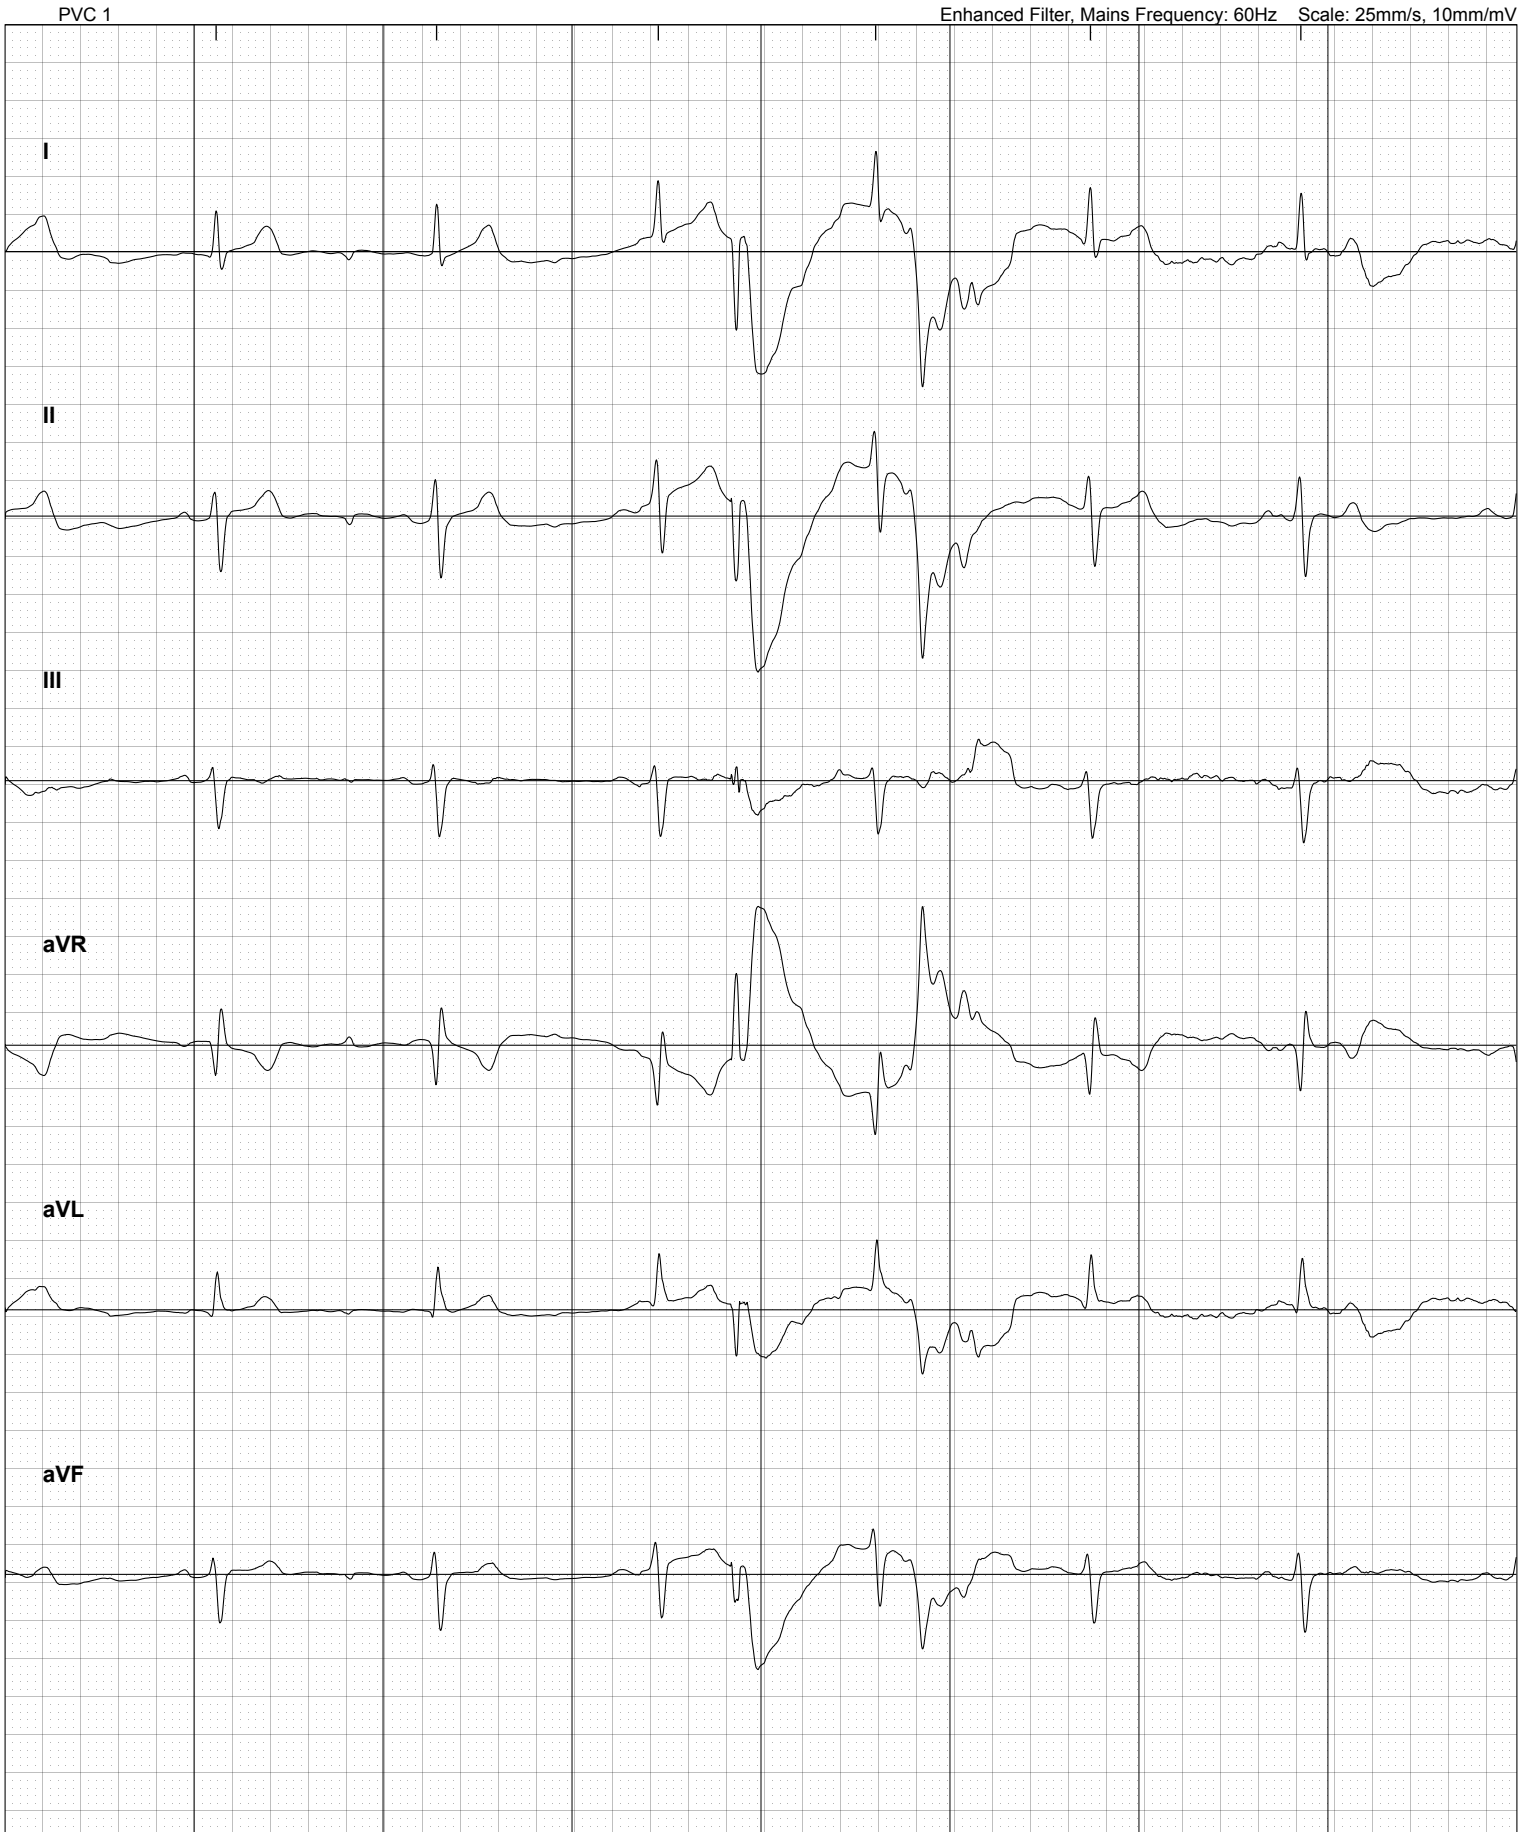

## PVC Annotation

Kardia AI can detect the QRS locations within the ECG. It can also identify whether this beat is a PVC or not, the number of PVCs, and the PVC location. This feature is only available for ECGs detected as Sinus Rhythm.

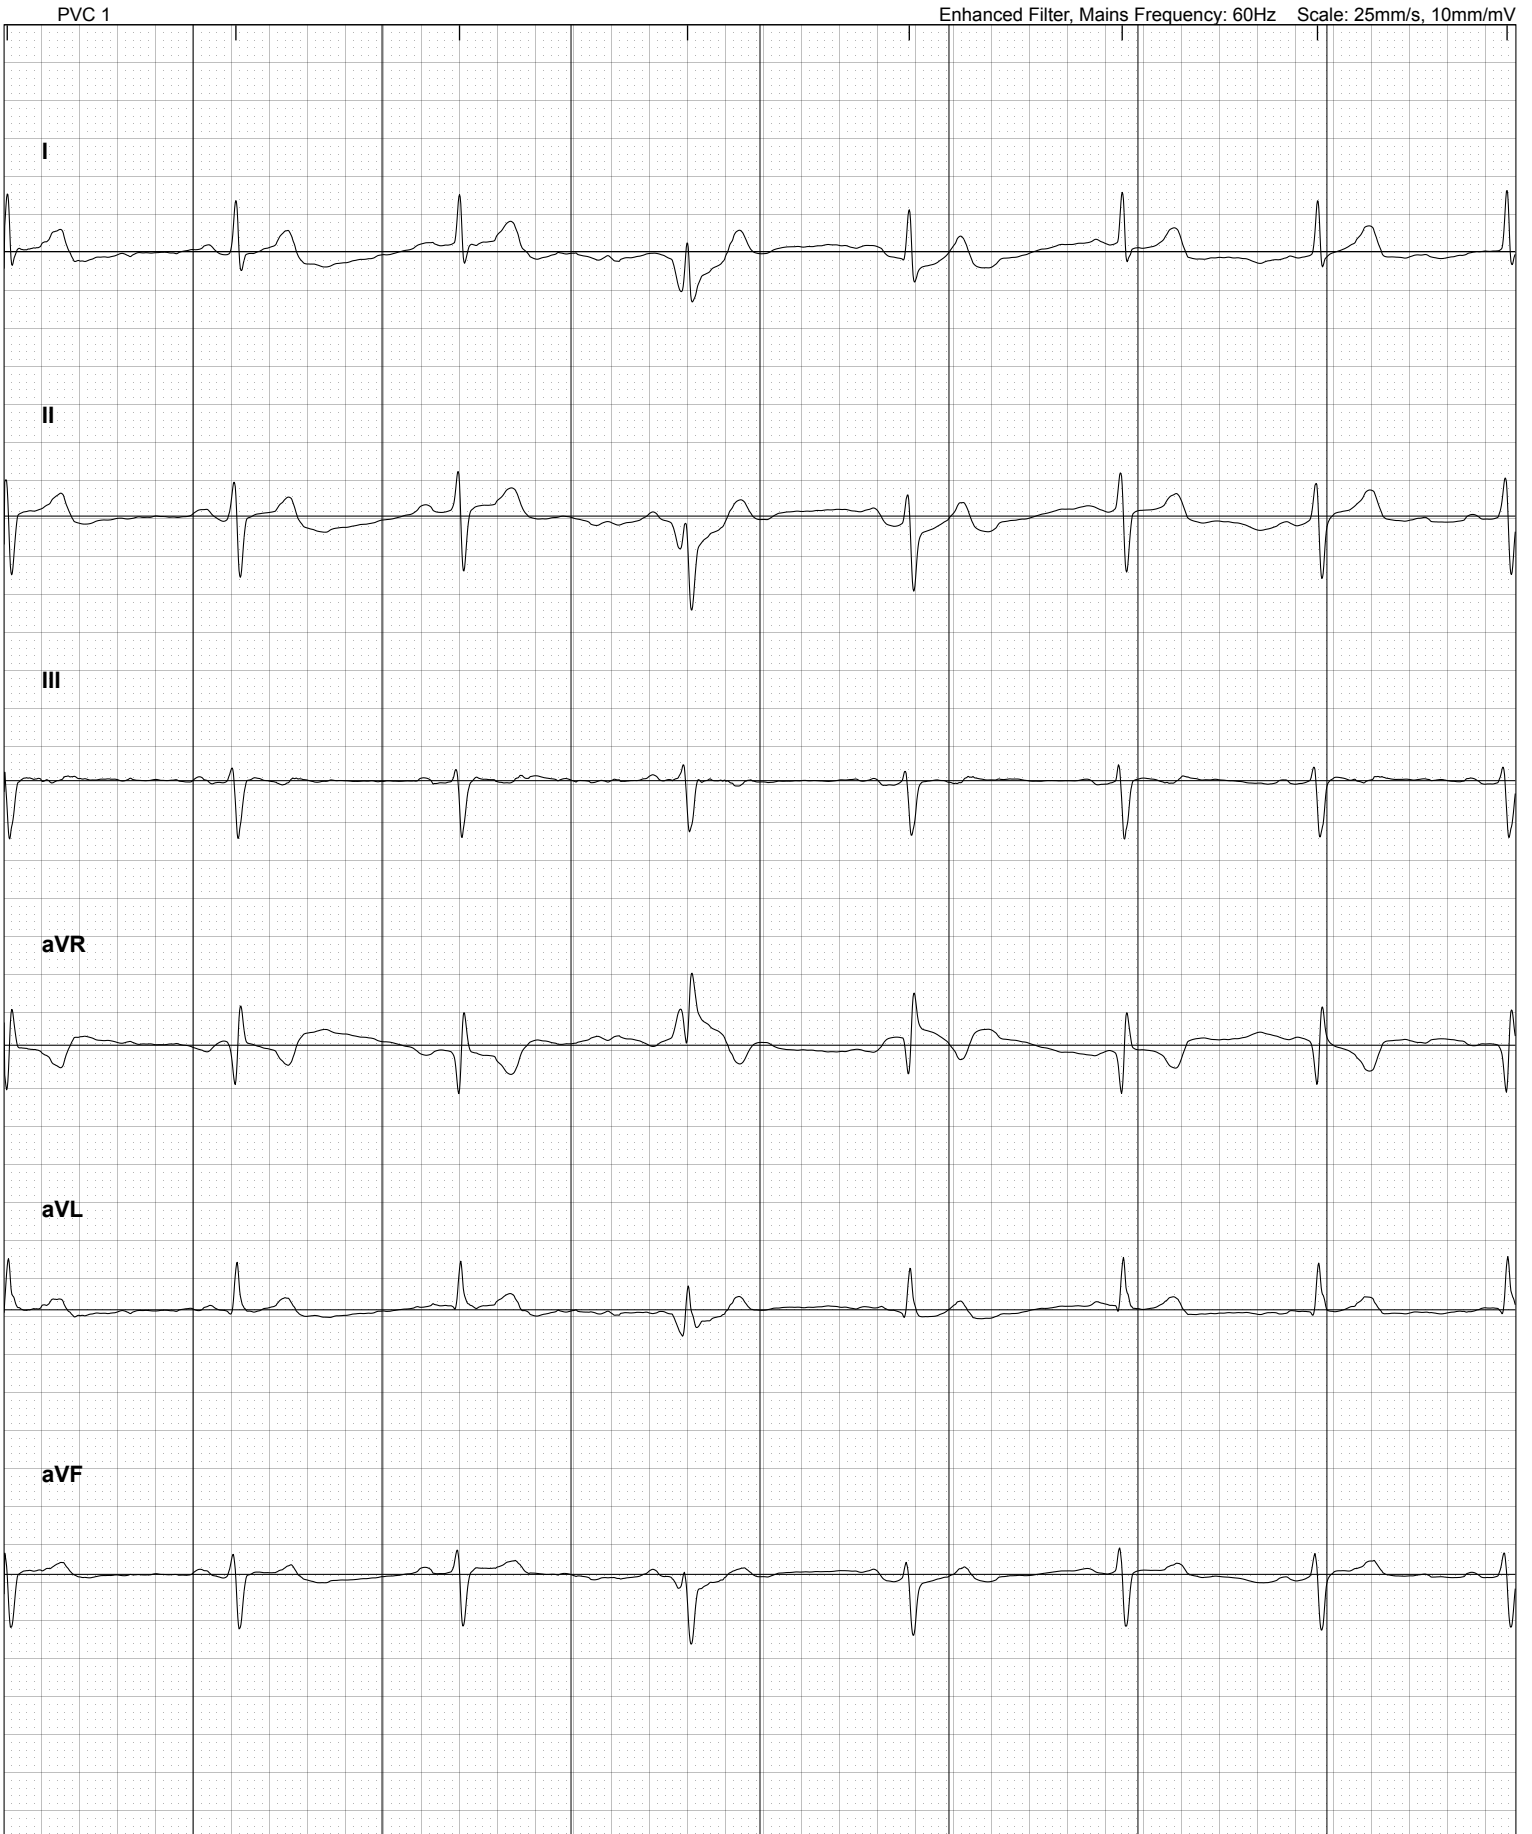

## PVC Annotation

Kardia AI can detect the QRS locations within the ECG. It can also identify whether this beat is a PVC or not, the number of PVCs, and the PVC location. This feature is only available for ECGs detected as Sinus Rhythm.

### PVC Annotation

Kardia AI can detect the QRS locations within the ECG. It can also identify whether this beat is a PVC or not, the number of PVCs, and the PVC location. This feature is only available for ECGs detected as Sinus Rhythm.

### R-R Interval Plot

Detection of QRS locations allows Kardia AI to measure the distance between heartbeats or the RR interval. This can be used to review variability of heart rate, which may be useful in understanding heart rate variability, or to visually display irregularity in rate (such as in Afib).

### Average Beat Plot

The average beat display is the average of all the normal, non-ectopic (extra/missed) beats in the ECG. An average beat display is intended to be a simple visual representation of one beat in a 30-second ECG.
